

## NO STOMACH PAIN, GAS, INDIGESTION IN FIVE MINUTES

"Pape's Diapepsin" is the only  
real stomach regulator  
known.

"Really does" put bad stomachs in order—really does" overcome indigestion, dyspepsia, gas, heartburn and sourness in five minutes—that's just that—makes Pape's Diapepsin the largest selling stomach regulator in the world. If that you eat fermented into stubborn lumps, you belch gas and eructate sour, undigested food and acid; head is dizzy and aches; breath foul; tongue coated; your insides filled with bile and indigestible waste, remember the moment "Pape's Diapepsin" comes in contact with the stomach all such distress vanishes. It's truly astonishing—almost marvelous, and the joy is its harmlessness.

A large fifty-cent case of Pape's Diapepsin will give you a hundred dollars' worth of satisfaction or your druggist hands you your money back.

It's worth its weight in gold to men and women who can't get their stomachs regulated. It belongs in your home—should always be kept handy in case of a sick, sour, upset stomach during the day or at night. It's the quickest, surest and most harmless stomach regulator in the world.

## WOULD HAVE COLLEGES TAKE OVER FUNCTIONS OF SPECIAL AGENTS

**SPECIAL CORRESPONDENCE TO MORNING JOURNAL**  
Las Cruces, N. M., Jan. 4.—An extraordinary proposition comes to the State college from A. W. Hendrich, president of the University of Nevada at Reno. In a letter to President George E. Ladd, he proposes nothing less than a concerted movement to have the land grant agricultural colleges take over the functions of the hordes of special agents of the field division of the general land office. He would have the agricultural colleges pass upon the applications of settlers for patents for their lands.

He argues thus: "At the present time we recognize the fact that there is considerable criticism of the action of the special agent of the land office, urging technical objections very often to the clear listing of the claims of the settlers for patents to their lands. This is sometimes due to a lack of understanding on the part of the special agent as to the conditions under which the settler has to live and cultivate his land; there is also likewise a lack of sympathy which makes the problem of the settler all the harder."

"It would put the college in touch with the incoming settler," he argues, "and that immediately, and since the college would have to pass upon his work and his fitness to be recognized as a bona fide homesteader, it would thus have the guidance over him which we feel would tend to eliminate failures that usually prevail among our homesteaders."

The writer points out further that the homestead seeker would find it necessary to consult the college, if not because of his crops and livestock, then for a patent to his lands and thus would come in close touch with the very institution that can help him most.

The proposition is to be laid before congress if the heads of the various agricultural colleges give their consent and while bitter opposition is expected from the special agents of the land office, yet it is believed that congress would pass the necessary legislation, as the special agent does not stand well with congressmen and their constituents, especially in the west.

WANTED—Clean cotton rags at the Journal office.

## SAYS WE BECOME CRANKS ON HOT WATER DRINKING

Hopes Every Man and Woman  
Adopts This Splendid  
Morning Habit.

Why is man and woman, half the time, feeling nervous, irascible, impatient, worried, some days, headachy, dazed and unstrung; some days really incapacitated by illness?

If we all would practice inside-bathing, what a gratifying change would take place. Instead of thousands of half-sick, anemic-looking souls with puffy, muddy complexions we should see crowds of happy, healthy, rosy-cheeked people everywhere. The reason is that the human system does not with itself each day of all the waste which it accumulates under our present mode of living. For every ounce of food and drink taken into the system nearly an ounce of waste material must be carried out. It ferments and forms poisonous-like poisons which are absorbed into the blood.

Just as necessary as it is to clean the ashes from the furnace each day, before the fire will burn brightly and hot, so we must each morning clean the inside organs of the previous day's accumulation of indigestible waste and body toxins. Man and woman, whether sick or well, are advised to drink each morning, before breakfast, a glass of real hot water with a teaspoonful of limestone phosphate in it, as a harmless means of washing out of the stomach, liver, kidneys and bowels the indigestible material, waste, sour bile and toxins, thus cleansing, sweetening and purifying the entire alimentary canal before putting more food into the stomach.

Millions of people, who find their lives at the mercy of bilious attacks, cold stomach, nervousness and sleepless nights have become real cranks about the morning inside-bath. A quarter pound of limestone phosphate will not cost much at the drug store, but is sufficient to demonstrate to anyone its cleansing, sweetening and refreshing effect upon the system.

## FARMERS' WEEK DRAWS OLD MEN AND CHILDREN

Youngsters of Seven Sit Side  
by Side With Patriarchs of  
Seventy and Learn New  
Methods of Farming.

**SPECIAL CORRESPONDENCE TO MORNING JOURNAL**  
State College, Jan. 4.—Seventy-year-old men going to college? Seven-year-old boys sitting on the same bench with them and talking in the knowledge of an expert? "Impossible," one exclaims and yet, this seeming miracle can be observed at Farmers' week which opened today at the New Mexico College of Agriculture and Mechanical Arts. What is more, the lessons taught there will bear enormous dividends, even this year, in the state, and in time to come will transform the commonwealth into one of the richest of the union.

It is marvelous, the interest aroused among the men, many of them gray-headed, and the women, too, by these meetings. The scores of questions asked demonstrate this. Lifelong timidity is overcome and the question that the man and the woman on the farm have been aching to ask and to have answered are fired at the corps of experts that the college has placed at the disposal of all the people of the state, and who can save the people of this state millions right now and make millions for them, if the people desire to profit by their work.

### President Ladd Strikes Keynote.

Dr. George E. Ladd, who made the welcoming address, struck the keynote in his opening address. It was "Service Adapted to the Needs of the People of the Commonwealth." "My aim is to make this college the greatest man-made asset of the commonwealth," he declared. He outlined plans already under way and even more far-reaching plans for the future day when legislatures will recognize that the greatest work any legislature, any party, any government can do for the people and the state, is to help the people make a living from the soil. To make rural life more attractive, farming and stock raising more profitable, to utilize every acre of available soil in the best manner and to the best purpose, science and experiment can discover, are the very work that the college is doing and that is making it a "people's college" in the real sense of the term. He would put every incoming settler, every farmer, every stock raiser in direct touch with the college and its work by means of publicity, by meetings just like this one held in various parts of the state, by every practical method available, so that every settler, every county, could profit thereby.

He outlined the experiments inaugurated in sugar beet planting, spoke of the need of a poultry expert, a state veterinarian and most of all, an agricultural survey of the state. An appropriation from the legislature for this is the need of the hour, he declared. The United States government and state governments have spent immense sums for geographical surveys the past sixty years but the most important survey of all, an agricultural survey, has not been made and yet, it would be an investment that would pay tremendously, especially if the knowledge gained could be made available to the people through channels of publicity. In this connection, Dr. Ladd outlined briefly and convincingly the work of the college, its great success, its plans for the future and its present needs.

### Sugar Beets and Onions.

Director Fabian Garcia of the experiment station made a common sense talk on sugar beets and onions as adapted to the southern and lower portions of the state. He pointed out that the best sugar beets are raised in the higher and cooler valleys of northern New Mexico. But he hoped to equalize this advantage through experiments he is now conducting and in co-operation with Mesilla valley farmers. That is to plant the beets earlier, even in fall, so that they would mature before the hot weather sets in. This has been done successfully with table beets and other cool climate crops like onions, cabbage, etc. He emphasized how by planting onions early, fewer culls and more bulbs are obtained in the Mesilla valley and similarly situated regions. New Mexico onions had a fine reputation even before the Stars and Stripes floated over the commonwealth but the yield per acre was comparatively poor until the experiments of the college pointed out the way to increase the yield.

Professor Garcia and Dr. Ladd spoke in detail of experiments that are to be made shortly to adapt Sudan grass to New Mexico range conditions. They have high hopes of making sections that now support only one steer for an acre to yield sustenance for four, if their experiment of sowing Sudan grass on selected areas succeeds. They desire the co-operation, interest and friendship of the stockmen. It will be the last word on the adaptability of this drought resisting grass to ranges with a minimum rainfall, such as exists in Grant, Luna, Dona Ana and other counties.

### Chicken Raising a Man's Job.

That chicken raising is a man's job, was the dictum of one of the speakers when R. S. Trumbull, agricultural demonstrator of the El Paso and Southwestern, said that on many a farm, the farm wife and children, cleared \$150 a year from 500 chickens. He added, the work must be done right. An interesting discussion is promised when the subject comes up again on Wednesday.

Both Dr. Ladd and Professor Garcia declared that more than an average of nine inquiries out of every ten received by the college come from the farmers in the valley who are the titans of the soil. The stockmen do not realize what the college is ready to save them and to help them make, in solving their problems. Great losses that come from stock eating poison wood, the transhumant summer of months from all sorts of diseases, and because of lack of co-operation of stockmen with farmers, can all be prevented. It was shown that the Pecos valley lost \$300,000 worth of livestock last year because the grass up the range rotted. Yet the farmers in the valley could not get a market for their alfalfa at profitable prices. Dr. Ladd described how the hog cholera was stamped out in the Pecos valley and in San Miguel county.

More Than  
**A Million Dollar Gain**  
In Four Months

(Actual Gain in Shipments During the Last Four Months, \$1,120,128.10)

Start the New Year right—get the Gain Habit, and share our prosperity! This is the message we would send to the live, up-to-date merchants in this country.

With plants in the East making certain lines which are best made there, and plants in the West making the grades for which the West is famous, we have, with efficient methods, pluck and thrift, extended our business in every direction.

Our "Triangle of Efficiency" was linked together just about the time war was declared in Europe, but having faith in America, American institutions and American methods, we were not discouraged and overcame the shock of war and the pessimism of uncertainty which affected others so seriously, and we have made continuous, consecutive and consistent gains during the entire year, showing an increase of more than a MILLION DOLLARS in shipments during the last FOUR MONTHS.

A post card will bring an alert, enthusiastic and capable salesman from either corner of the triangle, and your first order will convince you that you have made no mistake IN BECOMING A LINK IN THIS GREAT CHAIN OF MODERN MERCHANDISING. Write today.

the farmers of the United States, that any other product. Here in New Mexico it will eventually prove your greatest money maker. It has transformed some of the most poverty stricken farming districts into the most fertile regions of wealth. Districts in which the poor man's rags and shacks were replaced by the mansions of the rich. Dr. J. E. Gibson recently visited along hog cholera from A to Z. He has studied it for forty years and declared positively that it can be controlled, that it can be prevented, and there is even hope of finding a cure. He explained its cause, its diffusion, and how it can be prevented, by inoculation with serum or virus or both. "Sanitation," is the basic word in the English language in his opinion, when it comes to hog raising and admitted that the New Mexico man is the greatest conscientious hog raiser. He warned the farmers who are selling the farmers hog cholera virus and said that the government will be after them with all the power of its command. Printing out that the United States last year lost \$15,000,000 through the hog cholera and \$12,500,000 in livestock, he per cent of which might have been saved through proper care and the application of the knowledge that the people possess, he exclaimed: "We are losing too much money in the country, and it is this kind of work that

will eventually save it."

Alma Riches, the new supervisor of the home economics work, presided at the housewives' meeting, which has proven very interesting and helpful. The importance of vegetables in the diet and principles of vegetable cookery, were brought home to all present. Mrs. Edwin Davidson gave a demonstration and led the discussion. Prof. W. T. Conway gave a talk on "Coming in New Mexico." The importance of the vegetable garden was emphasized, for only the best of the prime minister of Hungary declared that Germany was enabled to maintain war so long because its farmers had long ago learned the value of the vegetable garden and if Germany's allies failed her, it was because they had neglected the vegetable patches.

**HE COULD HARDLY GO.**  
"About two years ago I got down on my back until I hardly could go," writes Solomon Rosette, Flat River, Mo. "I am a 500 lb. of Pape's Kidney Pills and they straightened me right up." Common symptoms of kidney trouble are backache, headache, rheumatism, pain, soreness and stiffness, puffiness under eyes, stomach cramps, sleep disturbing bladder troubles, and a constant tired feeling. Pape's Kidney Pills help to eliminate the poisonous waste matter that causes these symptoms. Ask everywhere.

## WIRELESS SERVICE ON MISSISSIPPI BARGES

**THE MORNING JOURNAL SPECIAL LEADER WIRELESS**  
New York, Jan. 4.—Wireless telegraph service is to be installed on the Mississippi river, according to an announcement made here today by the Marconi company.

The fleet of barges, each of which will be of 1,000 tons, will ply between Minneapolis and New Orleans, in competition with the railroad service. Help wireless equipment will be used in keeping shippers advised of market conditions and directing the transshipment of cargoes to take advantage of favorable developments. The Indiana Navigation company of this city is back of the project.

## STOP CATARRH! OPEN NOSTRILS AND HEAD

Says Cream Applied in Nostrils  
Relieves Head-Colds at Once.

If your nostrils are clogged and your head is stuffed and you can't breathe freely because of a cold or catarrh, just get a small bottle of Ely's Cream Balm at any drug store. Apply a little of this fragrant, astringent cream into your nostrils and let it penetrate through every air passage of your head, soothing and healing the inflamed, swollen mucous membrane and you get instant relief.

Ah! how good it feels. Your nostrils are open, your head is clear, no more sneezing, sniffing, blowing, no more headache, dizziness or straggling for breath. Ely's Cream Balm is just what sufferers from head colds and catarrh need. It's a delight.

## GREEK TREASURY IS BECOMING EMPTY

**THE MORNING JOURNAL SPECIAL LEADER WIRELESS**  
Paris, Jan. 4 (1916).—The Parisian financiers declare that a note which M. Doumergue, French minister of finance, handed to Premier Briand, protesting against the arrest of the German and other banks at Athens, was a violation of Greece's neutrality.
